

MARKET ADVANTAGES

POS and Inventory Control for Hospital Gift Shops

Key Features and Benefits for the Unique Needs of Volunteer Staffed Hospital Gift Shops

Appearances can be deceiving, and hospital gift shops are no exception. Beyond the typical inventory of plush animals, greeting cards, and flowers sold mostly to patient visitors, doctors and hospital staff also generate much business that requires special capabilities.

Keystroke is a proven solution for both the internal retail operation of foundation owned gift stores, as well as for the integration requirements of hospital IT and accounting departments.

The primarily volunteer staff and other unique operational issues are no obstacle for Keystroke POS!

Made to Help Your Business Grow...

- Ideal for volunteer staffing – Simple to learn and use.
- Minimal training required for fast and easy POS sales entry.
- Touch-screen and keyboard friendly. Enlarged on-screen buttons available for visually impaired clerks.
