

Customer Billing and Sales History Tracking for Construction and Service Trades

***Key Features and Benefits for the Unique Needs of
Plumbers, Electricians and Other Professional Service Contractors***

Professional service trades face unique challenges in efficiently billing and tracking services, materials, and installed equipment. The Keystroke POS system provides the special features needed to help you better manage your professional service business.

If you're an independent owner-operated tradesman or a mid-sized service or contracting business – Keystroke POS is the right fit. High-end specialty packages for the construction and service trades are often overkill, and typical off-the-shelf bookkeeping packages simply don't handle many real-life aspects of successful service trade businesses.

Made to Help You Build Your Business...

- Simple and flexible transaction entry with free-form comments for notes, warranty details, and special descriptions.
- Use the same straight-forward procedure to create (or convert) quotes, estimates, service orders, and invoices.
- Full-editing of all transactions – even final invoices! This allows you to easily make corrections and provide your customers easy to understand bills for prompt payment.
- Print multiple linked invoices from a single estimate or service order – allows you to bill as you go for work completed.
- Comprehensive inventory with serial number tracking – available, but fully optional depending on your needs.

And Ready to Serve Your Business Well!

- Instant access to complete customer and vendor history.
- No need for end-of-year close or archive – makes lookup for customer service and warranty issues a breeze!
- Built-in employee time clock.
- Basic and advanced reporting capabilities.
- Fast and secure credit card processing with competitive rates and automated recurring billing.
- Links with your existing QuickBooks® or Peachtree® accounting system.
